Letter No. BI. P.R. 18/58-59 dated 19.5.58 from the Divil. Commr. Bangalore Divn.

Re: Permission to cultivate perennial and wet crops in dry blocks on a temporary basis and on permit system in the T.B. project area, Bellary Dist.

1) At the Inter State Conference of the Chief Ministers and Ministers for Irrigation & Power of Mysore and Andhra Pradesh States held in October 1957 it was agreed, among other things, as follows:—

"The Sharing of the benefits under the Low Level Canal will be on the basis of the water requirements ~~of the various requirements~~ of the areas localised in Andhra Pradesh and Mysore States.

It is agreed that any change in the cropping pattern in a State involving any change in the draw off of water in any area be intimated to the other State; and that if such a change in the cropping pattern involves an overall draw off in excess of that indicated in the above para, the consent of the other State be obtained before such change is given effect to."

2) Now, as intimated by the Divil. Commr. Bangalore Divn (Vide pages 1-2 C.F.) the Tungabhadra project Irrigation Development Committee at its meeting held on 25.4.58

Note.—Contn. Sheet

Serial No.

has resolved as follows:-

"The Committee was of unanimous opinion to permit wet and perennial cultivation in dry blocks on purely temporary basis and on permit system without conferring any right for permanent cultivation, till such time as the entire ayacut is brought under irrigation. This should be purely on a temporary basis and without prejudice to the localisation Scheme. The irrigation authorities should examine such cases and issue permits. Village area every year. Govt may be addressed for necessary concurrence."

The Divisional Commr. has requested for approval to the resolution of the TBP Irrigation Devt. Committee.

3) In this connection it is necessary to ~~obtain the comments~~ request the CE MIN to examine the TBP Irrign. Committee resolution in the light of the Inter State Conference decision referred to above and to ask him to furnish (1) his comments (2) his definite recommendations in the matter of implementing or otherwise of the Committee's resolution and (3) if the resolution has to be implemented ~~Rs~~ whether it would be necessary ~~to obtain~~ either

20) I shall discuss this with the Dy Secy when I go there at Hospet in connection with TB Board meeting. No file required.

30/6

21) This has been discussed with Dy Secy & CE/MIN. It has been pointed out that in almost all cases distributaries & fields channels may not have the necessary capacity to take in addl. additional quantity of water for the addl. wet cultivation & hence lands classified as dry-cum-wet. The water aspect of the case also needs looking into. The Dy Secy is not in a position to give details of areas which are to be temporarily converted in view of the PWD's efforts to see that it does not jeopardise the possibility of the whether such conversion is possible. The Dy Secy.

SECRETARY TO GOVERNMENT
19 SEP 1958
PUBLIC WORKS & ELEC. DEPTT.

I am in duties to agree with the Chief Engineer when he says that permission should not be given for cultivating wet and perennial crops in areas localised as dry, for the reasons mentioned by him. It may be argued that (i) the imperative need in present context to produce more food requires that such ad hoc steps should be encouraged; (ii) the water in the reservoir is going to waste in as much as the entire localised area is not being

Note.—Contn. Sheet

fully cultivated ; area (iii) — the arrangements are keeping area. Can be discussed at the time of the last argument be been heard before in which this project also we have had experience of how much arrangements have to be established in spite of all efforts. Regarding this last argument, it must be pointed out that it is not as if food production is being neglected or hampered if water for wet cultivation is not made. There is no way to prevent farmers from taking water and growing irrigated dry crops which are just as good from the food production point of view as wet. In fact, food production is being hampered by growing water for more wet cultivation, although it may help improve the earning capacity of the right in the area.

I think the proposal should be rejected.

Bangalore-1,

Dated. 27th June *195* 8

D.O.B1.PR.18/58-59.

Dear Sri

698

Sub: Permission to cultivate perennial and wet crops in dry blocks on purely temporary basis and on permit system in the T.B. Project area, Bellary.

I invite kind reference to my letter No.B1.PR.18 of 58-59 dated 19-5-58 on the above subject and request you kindly to obtain orders of Government immediately as the paddy cultivation season has already commenced.

2. Sri Chella Narasimhappa of Nalludi, Bellary taluk who is a member of the T.B.P.Irrigation Development Committee met me today with some ryots and land owners under T.B.Project and represented that keeping in view the resolution No.10 passed at the T.B.P.Development - Committee meeting held on 25-4-1958, many dry-cum-wet land owners have brought up paddy nurseries with the hope that Government would approve of the resolution of the Development Committee. They are approaching the Deputy Commissioner, Bellary to issue temporary permits for paddy cultivation in their lands. If permission is not accorded immediately the owners of the lands will be put to lot of inconvenience and loss and I see signs of agitation for the delay in implementing the decision of the Committee.

3. The Superintending Engineer, T.B.Reservoir and the Executive Engineer, Special Irrigation Division, Bellary who were also present at the Development Committee meeting held on 25-4-1958 had no objection to the resolution unanimously passed at the committee. I trust that there

would be no difficulty to approve the resolution of the Development Committee so long as the ceiling of limit water assigned to this area is not exceeded.

4. You are fully aware having been associated with the T.B.Board from the beginning why Bellary District has not been able to use all the water assigned to it, how the present system of grouping of lands into perennial, wet and wet-cum-dry cultivation has placed at a disadvantage the ordinary ryot and what his feelings are. I shall be thankful if you could kindly look into the matter personally and see that immediate relief is afforded to the ryots who have brought up nurseries at considerable expense with the hope of getting water temporarily.

Yours sincerely,

Sri D.K.Srinivasachar, I.A.S.,
Secretary to Government,
Public Works Department,

NOTE.

Sub: Permission to cultivate perennial and wet crops in dry blocks on a temporary basis and on permit system in the Tungabhadra Project Area, Bellary District.

======

At the Inter State Conference of the Chief Ministers and Ministers for Irrigation and Power of Mysore and Andhra Pradesh States held in October 1957 it was agred, among other things, as follows:-

"The sharing of the benefits under the Low* Level Canal will be on the basis of the water requirements of the areas localised in Andhra Pradesh and Mysore States.

It is agreed that any change in the cropping pattern in a State involving any change in the draw off of water in any area be intimated to the other State; and that if such a change in the cropping pattern involves an overall draw off in excess of that indicated in the above para, the consent of the other State be obtained before such change is given effect to".

In May 1958 the Divisional Commissioner, Bangalore Division reported that the Tungabhadra Project (Bellary District) Irrigation Development Committee at its meeting held on 25-4-58 resolved as follows:-

"The Committee was of unanimous opinion to to permit wet and perennial cultivation in dry blocks on purely temporary basis and on permit system without conferring any right for permanent cultivation, till such time as the entire ayacut is brought under irrigation. This should be purely on a temporary basis and without prejudice to the localisation scheme. The irrigation authorities should examine such cases and issue permits village-wise every year. Government may be addressed for necessary concurrence".

The Divisional Commissioner requested for approval to the resolution of the Tungabhadra Project Irrigation Development Committee.

As it was necessary to examine the resolution of the committee in the light of the Inter-State Conference decision referred to above, the Chief Engineer, Major Irrigation North was requested to furnish (1) his comments, (2) his definite recommendations in the matter of implementing or otherwise of the Committee's resolution and (3) if the resolution has to be implemented, whether, it would be necessary either to to inform the Andhra Pradesh Government or to obtain their consent.

15

Pending receipt of the Chief Engineer's report the matter was discussed by the Secretary, P.W.D. with the Deputy Commissioner, Bellary District, and the Chief Engineer, Major Irrigation (North) on the 3rd July 58, at Munirabad. The latter pointed out that in almost all cases the distributaries and field channels may not have the necessary capacity to allow additional quantities of water for allowing wet cultivation of lands classified as dry-cum-wet. The health aspect of the case also needs looking into. The D.C. has not so far given the details of areas which are to be temporarily converted in the manner suggested and unless that is done it is not possible for the P.W.D. to say whether wet cultivation is possible. The Deputy Commissioner was therefore requested to furnish necessary particulars to the Chief Engineer, Major Irrigation North and also consult the Health authorities. Further action is possible only after a full report is received from all these officers.

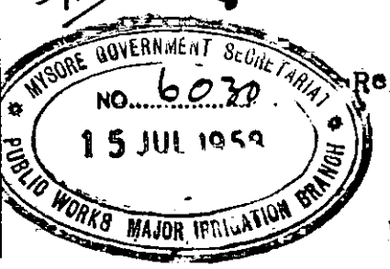
OFFICE OF
THE CHIEF ENGINEER, PWD. MAJOR IRRIGATION, NORTH- MUNIRABAD-RAICHUR DIST.

Date 8-7-58

To

The Secretary to Government,
Public Works Department,
Bangalore.

Sir



Sub:- Tungabhadra Project- (Bellary side) Permission to cultivate Perennial and Wet crops in Dry Blocks on a purely temporary basis and on permit system.

Ref:- Your letter No. PWD 242.TBP 58 dated 21-6-1958.

With reference to above, I write to state that the above subject was discussed with you and Divisional (Deputy) Commissioner Bellary at Munirabad on 3-7-58. The Divisional Commissioner has promissed to send over the particulars as the location, extent proposed for irrigation to see if this from the technical point of view is feasible, because the distributaries are limited in capacities.

Yours faithfully,

7.7.58

for Chief Engineer, PWD,
Major Irrigation North,
Munirabad.

7.7.58

17

Dear L. Rebello

Sub: Permission to cultivate perennial and wet crops in dry blocks on purely temporary basis and on permit system in the T.B. Project Area, Bellary.

Please refer
With reference to your D.O. letter No. BI PR. IP/87
dated 27.6.88 regarding the above subject, I write
to state that the matter was discussed by me with the
CE(MIN) and D.C. Bellary last month on 4.7.88, when I was at
Hospet, in connection with the Tungabhadra Board meeting. The
CE stated that in about all cases, the distributaries and
field channels might not have the necessary capacity to
allow additional quantity of water for allowing wet-
cultivation of lands classified as dry even wet. The
health aspect of the case also needs looking into. The
D.C. has not so far furnished the details of areas which
are to be temporarily converted in the manner
suggested and unless this is done, it is not possible
for the P.W.D. to say whether wet cultivation is possible
or not. The D.C. was therefore requested to
furnish the necessary particulars to the CE(MIN) and
also consult the Health authority in the matter. Further
action will be taken after a full report is
received from the D.C. Bellary and the CE(MIN).

DO No.PWD 242 TBP 58

Dear Sri.Rebello,

Sub:-Permission to cultivate perennial and wet crops in dry blocks on purely temporary basis and on permit system in the Tungabhadra Project Area, Bellary.

Please refer to your D.O. letter No. BP 18/58-59 dated 27-6-1958 regarding the above subject. I discussed the matter with the Chief Engineer, Major Irrigation (North) and Deputy Commissioner, Bellary last month, when I was at Bellary. The Chief Engineer stated that in almost all cases, the distributaries and field channels might not have the necessary capacity to allow additional quantities of water for allowing wet cultivation of lands classified as dry-cum-wet. The health aspect of the case also needs looking into. The Deputy Commissioner has not so far furnished the details of areas which are to be temporarily converted in the manner suggested and unless this is done, it is not possible for the Public Works Department to say whether wet cultivation is possible or not. The Deputy Commissioner was therefore requested to furnish the necessary particulars to the Chief Engineer, Major Irrigation (North) and also consult the Health authorities in the matter. Further action will be taken after a full report is received from the Deputy Commissioner, Bellary and the Chief Engineer, Major Irrigation (North).

Yours sincerely,

To

Shri. R.J.Rebello, I.A.S.,
Divisional & Joint Development Commissioner,
BANGALORE.

Copy to Chief Engineer, Major Irrigation (North)

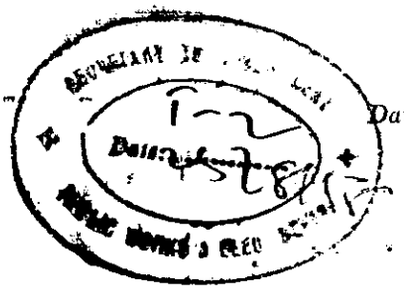
Addl. District Magistrate.



BELLARY, 11
Dated. 24th. Aug. ...1958.

D.O.
Rc. No.7049/58-A2.

Dear Sri Srinivasachar, ...

Sub: Permission to cultivate perennial and wet crops in dry blocks on purely temporary basis and on permit system in the T.B. area, Bellary.

--

1186.

With reference to your D.O. letter No.PWD 242 TBP 58 dated 14-8-58, addressed to the Divisional Commissioner and copied to me, I enclose herewith a statement showing the villages in which and the extents for which there is demand for grant of permission to cultivate perennial and wet crops in dry blocks.

2. In this connection I may also intimate to you that the subject was discussed by me with the members of the localisation committee consisting of the Executive Engineer, Special Irrigation Division, Bellary, Special Agricultural Officer, Bellary and the Assistant Commissioner, No.III, T.B.P., Bellary. The Special Agricultural Officer gave the list of villages and the extents in respect of which the permit system is sought to be introduced. The Executive Engineer, Special Irrigation Division, stated that it may not be possible to give water to the entire extent mentioned in the statement, as the capacities of the distributories are limited. It was suggested after discussion that Government may be requested to approve the proposal of granting permits for the current year as the full ayacut is not yet developed. If that proposal is approved, it is suggested that individual cases may be referred to the localisation Committee which will inspect the area, if necessary and decide if the particular field

may be permitted to take water for perennial or wet cultivation. On the strength of the decision of this committee, the Special Assistant Commissioner, No.III, T.B.P., Bellary may issue permits to the applicants under intimation to the concerned Assistant Engineers and Tahsildars. In all these cases, wet and perennial cultivation will be permitted only beyond a distance of half-a-mile from the village proper. In view of this it may be unnecessary to consult the Health authorities.

3. It may also be laid down that in all such cases, the water rate will be 50% more than the normal rates and that it may be understood clearly that the permit is only for the current year and that the permit holder cannot claim its renewal during next year and that there will be no undertaking that his cane will be purchased by any of the sugar factories.

4. I request you kindly to obtain orders of Government and communicate the same early.

Yours sincerely,

(M.D. SHIVANANJAPPA) 24/1

Shri D.K. Srinivasachar, I.A.S.,

MYSORE GOVERNMENT SECRETARIAT
NO. 1111
15 SEP 1958
PUBLIC WORKS BRANCH

Sub:- Tungabhadra Project- (Bellary side)-Permission to cultivate perennial and wet crops in Dry blocks - on a purely temporary basis and on permit system.

Ref:- Your D.O.No. PWD 242 TBP 58 dated 25-8-1958.

Sir,

With reference to the above cited communication, I write to state that the irrigation development Committee and the Deputy Commissioner, Bellary, have opined that wet and perennial cultivation in Dry blocks may be permitted on purely temporary basis by issuing permits every year, under Low Level Canal Right side in Hospet, Bellary and - Siruguppa Talukas.

1412

MYSORE GOVERNMENT SECRETARIAT
NO. 8343
15 SEP 1958
PUBLIC WORKS MAJOR IRRIGATION BRANCH

Although it may be possible to effect changes in the localisation with the concurrence of Andhra Pradesh, as per decission arrived at in the Inter State Chief Minister's Conference, it is not desirable to permit the ryots to irrigate paddy or Sugar cane in Dry Blocks due to the following reasons:-

1. Once the ryots get used to paddy and Sugar cane cultivation, it will be difficult to make them change over from wet to Dry.

2. The Distributaries and field channels are not designed for the additional capacity to let in extra quantity of water required for wet irrigation. Any change in the crop pattern will lead to many complications in regard to the design of distributaries and field channels. When once permission is given for additional area to be irrigated, it should be possible to supply more water in the distributaries, which is not the case.

3. At this stage, when the development of Ayacut is in rapid progress it is not desirable to change the present approved localised area until a fair trial is given.

4. The Waters of Tungabhadra have been harnessed to eliminate to a major extent the un-certainity in

PTO.

in the supply of water to crops due to failure of rains and to give protection to as large an extent of dry crops as possible, and with this in view a large area of dry crops is localised. In case a few cultivators are permitted to grow wet or perennial crops in place of dry crops, then there will be agitation from the other cultivators as well. Ultimately the area under dry will get reduced, -- defeating the present purpose of localisation.

Further I may mention here that Sri.S.V.-Rama Moorthy, Adviser, Planning Commission, and the Chief Secretary, Government of Mysore, during their recent visit to this project have emphatically stated that there should not be any change in the localisation already done.(Copy enclosed for ready reference).

In view of the above facts it is not desirable to encourage the temporary wet or perennial -- cultivation on permit system and there by to convert dry blocks into Wet Blocks.

Yours faithfully,

10. 9. 58

CHIEF ENGINEER, PWD,
MAJOR IRRIGATION NORTH.
MUNIRABAD.

10.9.58

YGR. 10/9.

Note of Inspection and discussion in Mysore from 2-6-58 to 6-6-58 by sri S.V.Ramamurthy,Programme Administration Adviser.

MAJOR IRRIGATION.

The progress of Major Irrigation is dealt with in the notes for the State working group considered at the meeting on 6-6-58.The reports on the Tungabhadra Project on the Raichur side and Bellary side as well as on Tunga Project Bhadra Project and Ghataprabha Project are contained in the papers for the State working group meeting which are passed on to the Director (P.A.) I noticed in the reports some tendency to hesitate in regard to the design of the project which is intended to spread the benefits of the project over as large a part of the population in the famine affected area as possible by having only limited paddy cultivation and having a major part of the irrigation for occassional irrigation of dry crops. I pointed out to the State working group that there should be no going back on this design though interested people near the reservoir might wish to get more water for paddy,-- thereby depriving lower dry land ryots of the benefit of irrigation for dry crops. I also pointed out that the fact that field channels are hereafter to be intended to be dug by the PWD. up to a 1 cusec limit should not mean a setback in the progress of the project where-hitherto 3 cusecs was the limit for field channels.The Superintending Engineer,Tungabhadra Project informed me that 1 cusec field channels are ready for 105,000 acres and that a 3 cusecs channels are ready 150000 acres. By the end of June 1958 he assured me that 150000 acres will have 1 cusec channels, The Chief Engineer asked that he may be provided with Rs. 50000 to purchase machines for digging field channels expeditiously. He was asked to make a special report so that this might be dealt with by the State Government and Planning Commission.I trust that the Director of Agriculture who has been taking energetic steps for propoganda and demonstration will see that one lakh of acres will be brought under irrigation in 1958-59.Further addition to the irrigable area may be achieved by the time of the rabi season. A point was raised whether for development under the Bellary side of the Tungabhadra Project as well as for Ghataprabha Project special provision of funds should not be made as in the case of the Tungabhadra Project on the Raichur side where on account of the long delay in its execution Rs. 2 crores were provided in the II Five Year Plan for development

PTO.

For development as a rule under other projects it is expected that funds would be found by the State within the total plan provision by adjustment where necessary. If however all the funds so necessary can not be found by adjustment it is open to the Government of Mysore to make a special case for provision for development of areas that are being brought under irrigation in view of the essential importance of the increase of food production.

These paper have nothing to do with the point raised in the letter dated 11-7-58 from Sri Rayan Gauda. Sri Rayan Gawd wants the localisation scheme to be scrapped to permit wet crops being raised on lands localised as dry-cum-wet, after obtaining permit every year. R.D. has no papers on the subject of localisation.

P.S. to M (P.W&E) id/- K.B 14/8.

The Rev. Secretary's interpretation of the letter is correct. I remember to have given him a date for interview on the subject. Neither he nor the deputationists turnedd up. Grant of permission for wet cultivation on permit system looks to be reasonable. But it will land us in trouble at a later date. The P.W.Secretary will please examine the request and put up his remarks.

HHC.
id/- 18-8-58.

XXX There are papers on the subject in the P.W.D. I think chief Engineer's report as well as Deputy Commissioner's report is awaited. ~~xx~~ put up.

DKS.
id/- 20-8-58.

It is asertained that the subject is being dealt with in the M.I.Section. This may be transferred to that section for needful action.

id/- 21-8-58.

With reference to para 7 it is submitted that the Original copy of the letter of Sri. Rayana Gowd M.L.A. (copy of which is flagged "T" in the R.D.file) was received in the P.W.D. With reference to that, a note (vide page 14 C.F in the P.W.file) was submitted to the Minister P.W. in file No.P.W.D.242 TBP 58, Placed below. That file was received back with the remarks of the Minister P.W. to the effect that the deputation which Mr. Gowd was to have

...

3/

have led did not turn up. The question relating to permission to cultivate perennial and wet crops in dry blocks on purely temporary basis and on permit system is under examination by the C.E.M I (N), to whom a report since received from the D.C Bellary, has been sent. His report is awaited.
